

NAVIGATE YOUR 3D WORLD

CadMouse

THE WORLD'S FIRST MOUSE FOR CAD PROFESSIONALS

Made For Each Other

When you pair a 3Dconnexion CadMouse with a 3Dconnexion 3D mouse like the SpaceMouse Pro or SpaceNavigator, the results are extraordinary.

We call it Two Handed Power. Your 3D mouse smoothly positions your object or view, while your CadMouse selects and creates with ease. It's a natural and comfortable work style that can't be matched. The 3Dconnexion CadMouse and our line of 3D mice don't just play well together. They were made for each other.

CadMouse's Best Friend

The optional 3Dconnexion CadMouse Pad provides the ideal balance between speed and control thanks to its high-quality micro-textured coating.
