

Make Your Mark

Perfect for kiosk and gift shop applications, the new METAZA MPX-95 photo impact printer is an affordable, easy-to-operate solution for personalizing high-value metal items and making them even more unique and profitable.

Optional Gift Kit

The MPX-95 expands personalization possibilities with an optional Gift Kit that includes the following:

Center Vise with Clamp Pins

Uniquely position different-sized clamp-pins to hold irregular shaped items for repeat, precise personalization of giftware, jewelry, and cylindrical items like vases.

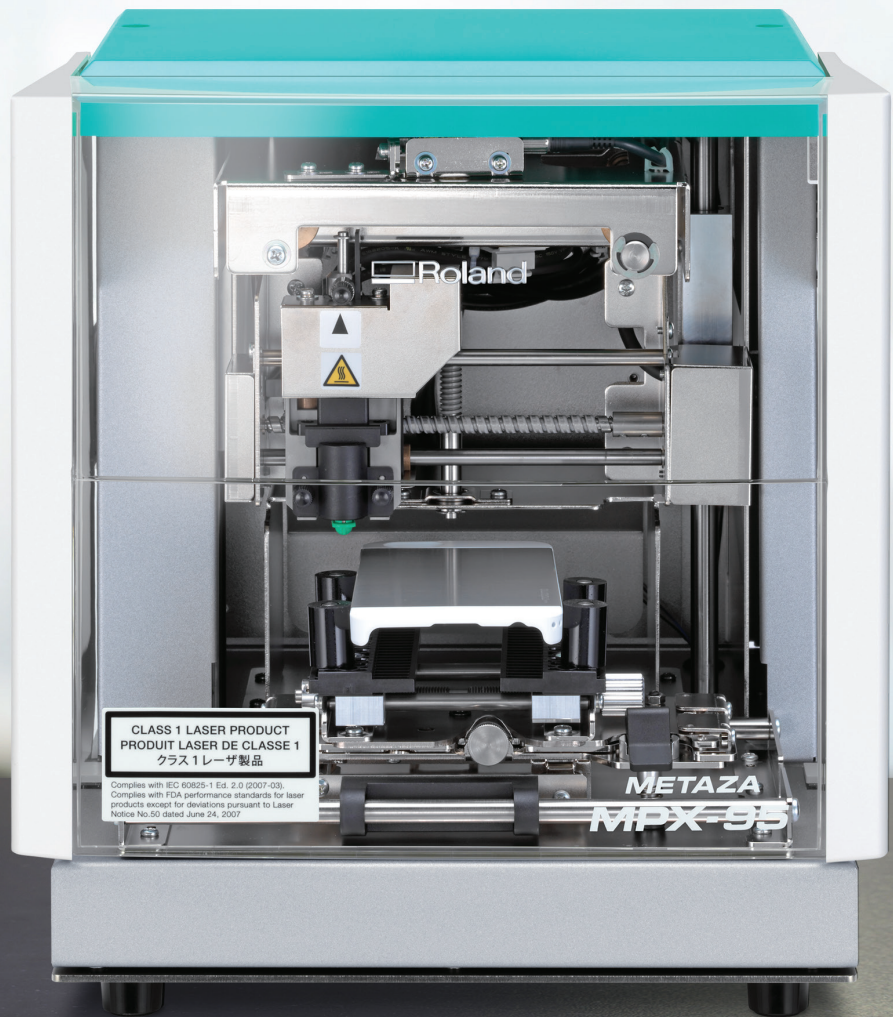

Center Vise

When imprinting onto different items in succession, the center vise allows for quick set-up and personalization.

Head Caps

Thirty rounded head caps are included in the Gift Kit for imprint use on curved and irregular surfaces.

An optional DPM Kit for marking surgical instruments and industrial tools is also available.

Optional Gift Kit Includes:

Moveable Center Vice

Clamp Pins

Head Caps (round bottom)

Personalize Hundreds of Metal Items

A diamond-tipped stylus strikes material with high-speed precision – producing detailed graphics and text on smart devices, jewelry, sunglasses, urns, golf clubs, and more.

Expand Your Media Options

The base plate and base unit can be removed to enable imprinting onto larger items like golf clubs and metal vases.

Accurate Laser Pointer Set-Up

Precisely define the origin point on media and set the print position at the touch-of-a-button.

Compact, Quiet and Portable

Ideal for taking to weddings, shows and events, the fully enclosed MPX-95 requires no daily maintenance, special power or ventilation.

Easy-to-Use Software Included

With METAZAStudio, users can import, edit and output vector files, EPS, and JPEGs, plus files from cameras, scanners and smartphones. Add borders and backgrounds, and rotate text and images. Dr. Engrave software is also included to enable import of Excel and CSV files and for variable data production.

Highlights & Specifications

- Imprints up to 26 digits of image and text data inside an area as small as one square millimeter
- Printable area of 3.2" x 3.2"
